Description :

Prsentation de l'diteurDr. Carly Cambridge, wildlife biologist, returns to the Texas Gulf Coast to manage the latest Habitats for Nature project, restoring the woods and wetlands to their natural state. She is devoted to the environmental cause with a passion usually reserved for a lover something she hasnt had since a disastrous love affair ten years earlier. Having sworn off women and relationships, Carly is perfectly content to live her life alone while she focuses on her latest project. Wildlife photographer Pat Ryan is duped into volunteering her talents to the Habitats For Nature cause, but she wants no part of the overzealous Dr. Cambridge. While they spend most of their time sparring and bickering, an early season hurricane finds them fighting nature instead of each other to save the wetlands and the birds that brought them together. Soon Carly finds her heart opening, little by little, and struggles to ignore the feelings that are growing between them. And Pat, always searching for that certain someone to take her breath away, cant believe for a moment that the woman shes been waiting for could possibly be Carly.Prsentation de l'diteurDr. Carly
